

ADAM

EXTENDED PROFILE

OVERVIEW

ABS’s ERP software, Advanced Distribution and Management (ADaM), is a modular Windows-based suite designed to enable growth through customer service, inventory and critical asset management applications: ABS’ ADaM system aims to be easy to use – featuring flexible look-ups and pop-up inquiries in the form of Event Notifications – yet sufficiently powerful for effective business management.

ADaM consists of 10 core modules: Accounts Payable, Accounts Receivable, Customer Processing (CRM; ‘ship to’ accounts; tax coding and control), Contact Management, General Ledger, Inventory Management (BoM; demand forecast; EOQ), Sales Order Processing (quotations; PoS; credit management), Purchasing and Receiving (purchase order expediting; shipment tracking), Vendor Processing (1099 coding; A/P invoicing) Sales Analysis and ADaM Report Builder (output to formats including RTF, PDF, XLS and HTML).

Specific versions of ADaM include Aviation Distribution and Management and Tire Order Management; the latter designed for commercial tire dealers and featuring Tire Order Processing, Quick Display and Quoting, Supplier Interface and Integration, Retread System Interface, Retread Plant Management and Dispatch Control Center modules.

ABS also states that ADaM can be customised via seven optional add-on applications: ADaM On-Line (e-commerce functionality including customer accounts, dynamic data access and shopping carts), ADaM ReCON (mobile access via tablet and smartphone), Asset Management, Wireless Warehouse Management (real-time via barcoding and RF devices), ADaM Mobile Sync (server deployment), ADaM E-Sign (legally binding signature capture) and Executive Visual Environment (data-visualized EIS).
