

DELMIAWORKS MANUFACTURING ERP (FORMERLY IQMS) EXTENDED PROFILE

OVERVIEW

Supply Chain Management, Project Management, Warehouse Management, HR, and CRM are just some of the software features DELMIAWorks Manufacturing ERP (formerly IQMS) offers teams looking for ERP software.

KEY FEATURES OF DELMIAWORKS

- **Manufacturing-centric ERP:** DelmiaWorks is designed for the manufacturing sector, with specialized modules for production planning, scheduling, inventory management, and quality control. Its industry-specific approach helps manufacturers streamline operations and cut waste efficiently.
- **Comprehensive integration:** The software provides seamless integration across all operational areas, including sales, customer relationship management (CRM), supply chain, and finance. This interconnected approach ensures data consistency and real-time insights across the organization.
- **Real-time visibility:** DelmiaWorks empowers manufacturers with real-time data for informed decision-making. Advanced analytics and reporting tools track KPIs, production efficiency, and market changes swiftly.
- **Scalability and flexibility:** DelmiaWorks is scalable, catering to small manufacturers and large enterprises. Ideal for expanding operations without changing ERP systems.
- **Quality management:** The software includes robust quality management tools that help manufacturers maintain high standards. With features like automated inspections and compliance tracking, DelmiaWorks ensures product quality and regulatory compliance.
- **Customer-centric approach:** With integrated CRM capabilities, DelmiaWorks enables manufacturers to build stronger customer relationships. The system facilitates better customer service through streamlined order management, improved communication, and faster response times.
