

UNIT4 ERP (FORMERLY AGRESSO/BUSINESS WORLD ON!) EXTENDED PROFILE

OVERVIEW

Unit4 ERP (formerly Agresso/Business World On!) is a fully integrated role-focused ERP.

The system is used widely in education, public sector and local government, research, financial services, professional services, transport and logistics, and wholesale and retail sectors, with a particular focus on organisations that operate in complex, service-driven environments.

Appealing to organisations looking to adapt business structures without heavy customisation, Unit4 ERP is available as a cloud-native solution as well as an on-premise deployment, allowing customers to choose the operating model that best fits their regulatory, operational, and data residency requirements.

Built on the heritage of Agresso ERP, Unit4 ERP is designed to support continuous change, offering strong financial management, budgeting, reporting, and project accounting capabilities. The system is known for its flexibility around organisational change, such as restructures, mergers, and evolving funding models, without requiring extensive reconfiguration.

PRODUCTS AND PRICING

Unit4 offers a range of ancillary products, including implementation services, consultancy, training, and ongoing customer support, helping organisations maximise long-term value from their ERP investment rather than treating deployment as a one-off project.

Pricing is based on bundles of 500 full-time equivalents, available as either a 15-year licence or on a per-month basis. (please download the extended software profile for more information.)
