

MASTERTOOLS

EXTENDED PROFILE

OVERVIEW

Online Computing designs, develops, implements and supports proprietary ERP software, called MasterTools. Online Computing has been serving businesses for 50 years, working closely with operations teams to anticipate requirements and solve real-world operational challenges.

MasterTools ERP has been developed for organizations with manufacturing, distribution, and supply-chain driven workflows. It is a fully integrated ERP with an extensive range of native modules, including:

- Invoicing
- Shipping & Receiving
- Shop Floor & Production Control
- Laboring & BOM functionality
- Inventory Control
- Warehouse Shop Floor
- CRM
- Payroll, and many more.

MasterTools integrates all modules into a single system, providing the company with full visibility into every business-critical aspect.

The platform is scalable, serving anywhere from 5 to 5,000 users on a single system. It is also highly configurable, supporting both on-premise and hosted deployments to match operational, security, and IT requirements.
