

SAGE 200

EXTENDED PROFILE

The Sage logo, consisting of the word "Sage" in a green, rounded, sans-serif font.

OVERVIEW

Sage 200 is a mid-market ERP from Sage aimed at growing small and medium-sized businesses. It combines financials, commercial (sales and stock) functionality, and reporting/Bi in a modular, cloud-enabled product that you can extend with extra modules and partner services.

CORE FEATURES

- Financial management: general ledger, accounts payable and receivable, bank reconciliation, and VAT/compliance features.
- Commercials/Supply chain: sales order processing, purchasing, inventory, and pricing/discount management across multiple warehouses and companies.
- Reporting and Business Intelligence: dashboards, configurable reports, and alerts that pull live data from the system.
- Collaboration and productivity: integrations with Microsoft 365 (Outlook, Word, Excel) so teams can work from familiar tools.

LICENSING AND PRICING

Pricing for Sage 200 typically depends on three main elements: the product edition or core licence, the number and type of user licences, and any implementation, hosting, or support services provided by Sage or an accredited partner.

Because needs vary by company (modules, users, connected companies, data migration, reporting, and hosting), custom quotations are required
